MOTIVATION

This material explains how to navigate in SAP systems. It is aimed at students at universities, universities of applied sciences and other educational institutions with no previous experience of SAP software. It can be used in the class or for self-study.

After completion of the course, students will be able to navigate through the user interface to work on business processes and case studies on their own.

Furthermore, this material serves as a reference for occasional users of SAP systems.

LEARNING METHOD

The learning method used is guided learning. This is a suitable method because navigating in SAP systems is a fundamental skill but also very complex.

The benefit of this method is that knowledge is imparted quickly. Students also acquire practical skills and competencies. Similar to a case study, this method explains a process or procedure in detail.

By using exercises at the end of each part, students can put their knowledge into practice and gain a sustainable understanding of the underlying processes.

Step 1: Logging On

Task Log on to the system.

Time 10 Min.

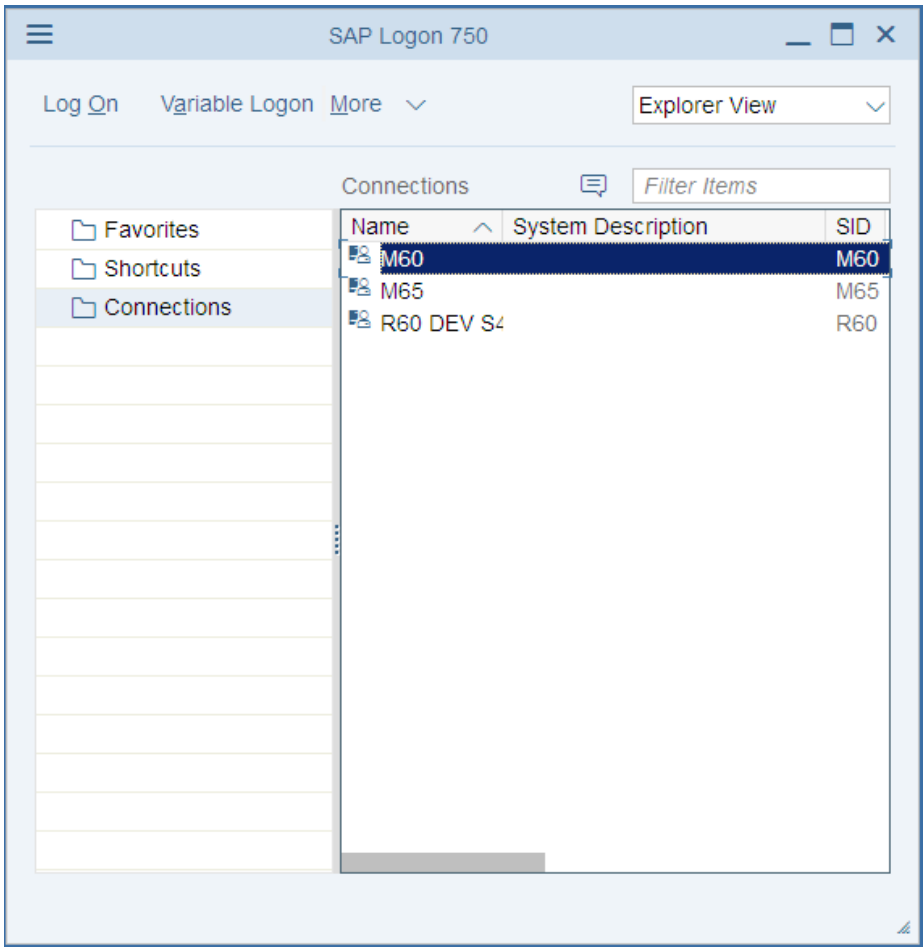

Short Description Use the SAP GUI to log on to the SAP system.

Find and double-click on the icon depicted on the left side of this page that you can find on your desktop. If it is not there, choose *Start* ► *All Programs* ► *SAP Front End* ► *SAP Logon*

SAP Logon

A dialog box similar to the one shown below appears. Select the SAP system specified by your lecturer and choose *Log on* or *Enter*.

The logon screen appears. The system requests the client, your user, password, and preferred language.

Client: _ _ _
 User: _ _ _ _ _
 Password: _ _ _ _ _
 Logon Language: _ _

Before you log on, you need to know the definition of the term “client.”

SAP systems are client systems. With the client concept several separate companies can be managed in one system at the same time.

Clients are the highest organizational level in the system. In business terms, each client can represent a group of companies, a company, or a firm – regardless of the size of the organization.

In commercial, organizational and technical terms, a client is therefore a self-contained unit with separate master records and its own set of tables. In SAP systems, different clients are identified by their client numbers.

Use the client number given by your instructor. For you to be able to log on as a user, a user master record must be created for you in the relevant client. For reasons of access protection, you must enter a password when you log on. Your password entry is case-sensitive.

SAP systems are multilingual. Choose the language for your session in the Language field. Then choose *Enter*.

Enter the user name, the initial password and the logon language given by your lecturer.

When you log on for the first time, a dialog box appears in which you enter your new individual password twice.

Client: _ _ _

User: LEARN-###

Password: tlestart → log on

Client

Logon screen

The screenshot shows a dialog box titled "SAP" with a hamburger menu icon on the left and a close icon on the right. It contains two input fields: "New Password:" and "Repeat Password:", both filled with asterisks. Below the fields is an information icon and the text "Passwords are case-sensitive". At the bottom right, there are two buttons: "Transfer" and "Cancel".

The first time you log on you will see a copyright note. Confirm it with **Continue** or *Enter*.

The screenshot shows a dialog box titled "Copyright" with a hamburger menu icon on the left and a close icon on the right. The text inside reads: "SAP user name GBI-100", "First system logon", followed by a horizontal line, "Copyright(c) SAP AG 2002.", "All rights reserved.", and "License does not expire". At the bottom right, there is a small square checkbox.

The initial screen with the SAP Easy Access Menu appears.

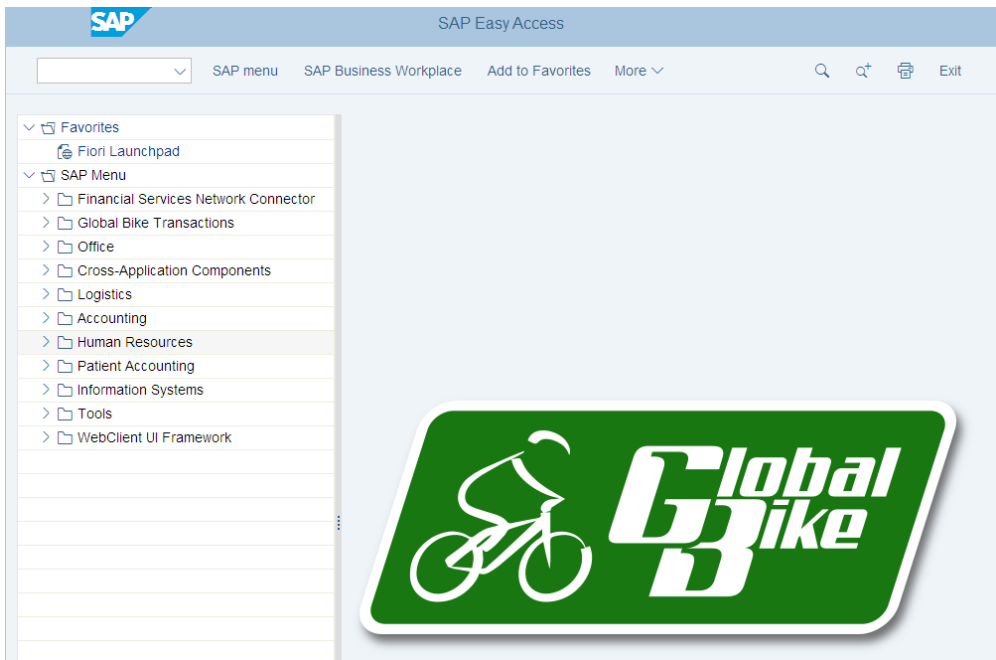

Step 2: Initial Screen

Task Get familiar with the SAP system screen.

Time 10 Min.

Short Description Identify and familiarize with each element of the SAP system screen.

This is the initial screen as described in more detail below.

Initial screen

Menu Bar

Menu Bar

The displayed menus depend on the action/transaction in the SAP system except for the system and help menu. This dependency is described as context sensitive.

Title Bar

Title Bar

The title bar displays the name of the transaction you are currently using. It is located on every primary window and dialog window under the standard toolbar and above the application toolbar.

Application Toolbar

Application Toolbar

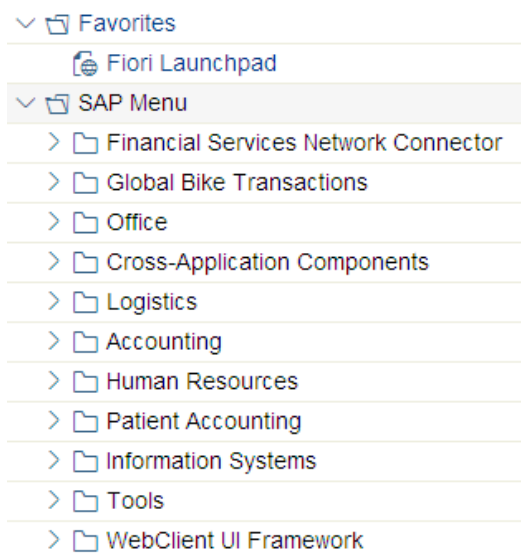

The application toolbar contains icons and buttons applicable to the transaction you are currently using. Example: Transaction SU01 *User Maintenance: Initial Screen*.

SAP Easy Access Menu

The SAP system displays the SAP Easy Access menu on the start screen as standard. It enables you to navigate in the system using a clear tree structure.

Click on the small arrows to expand the menu tree. The menu tree is specific to your role (business function in the company).

SAP Easy Access Menu

Exercise

Open the following tree structure!

- ▼ Favorites
 - Fiori Launchpad
- ▼ SAP Menu
 - > Financial Services Network Connector
 - > Global Bike Transactions
 - > Office
 - > Cross-Application Components
- ▼ Logistics
 - > Equipment and Tools Management
 - ▼ Materials Management
 - > Purchasing
 - > Inventory Management
 - > Logistics Invoice Verification
 - > Physical Inventory
 - > Valuation
 - > Material Requirements Planning (I
 - > Returnable packaging logistics
 - > Service Entry Sheet
 - > Service Master
 - ▼ Material Master
 - ▼ Material
 - > Create (Special)
 - > Create (General)
 - > Change
 - > Flag for Deletion
 - ▼ Display
 - ⊗ Display Current
 - ⊗ Display at Key Date

Exercise 1

1.1 What is the difference between the transactions *Display Current* and *Display at Key Date*?

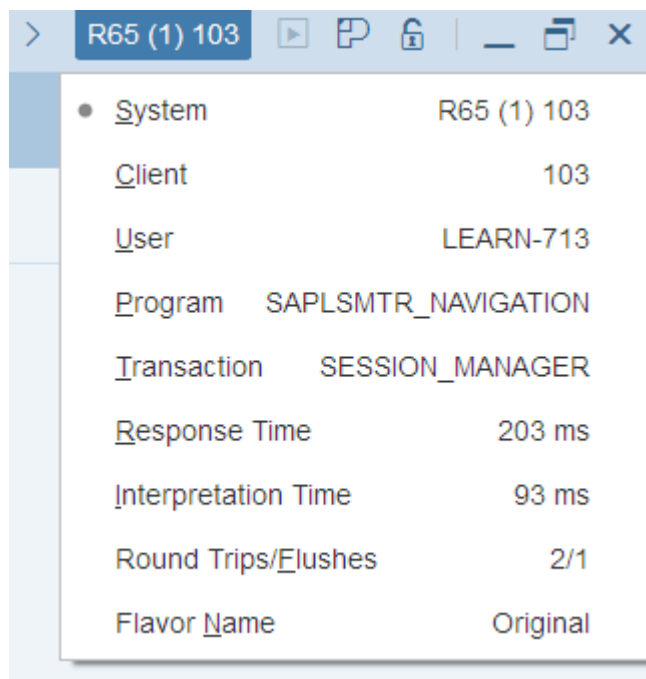

Status Bar

Status Bar

The status bar shows information over the actual system status. You find it in the upper corner of your screen.

Click on the actual system.

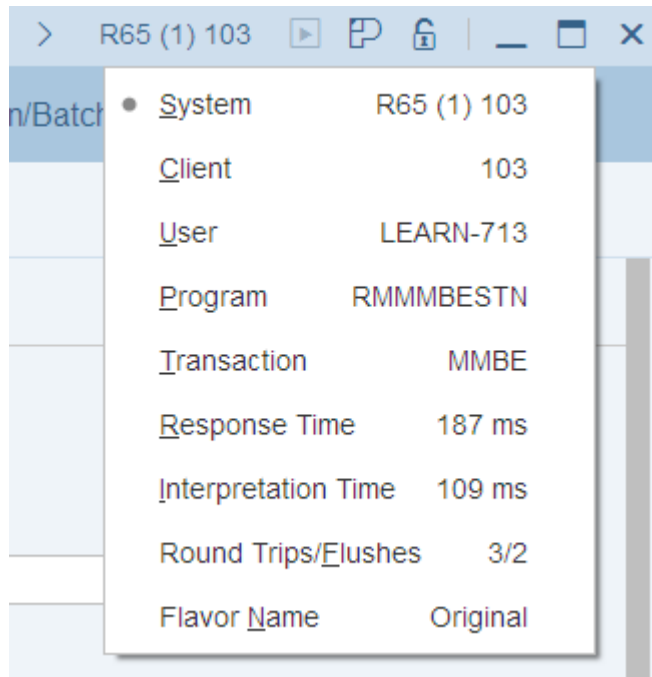

There you find information about your client, user and also the current transaction.

Follow the menu path:

Logistics ► Materials Management ► Inventory Management ►
Environment ► Stock ► Stock Overview

You are now in the transaction *Stock Overview: Company Code/Plant/storage Location/Batch*. Click again on the current system. You will now see the transaction code **MMBE**.

Choose **Exit** to go back to the SAP Easy Access Menu.

Success-, Warning- and Error messages

The status bar shows information about the current system status as well as warning and error messages.

Success-, Warning- and
Error messages

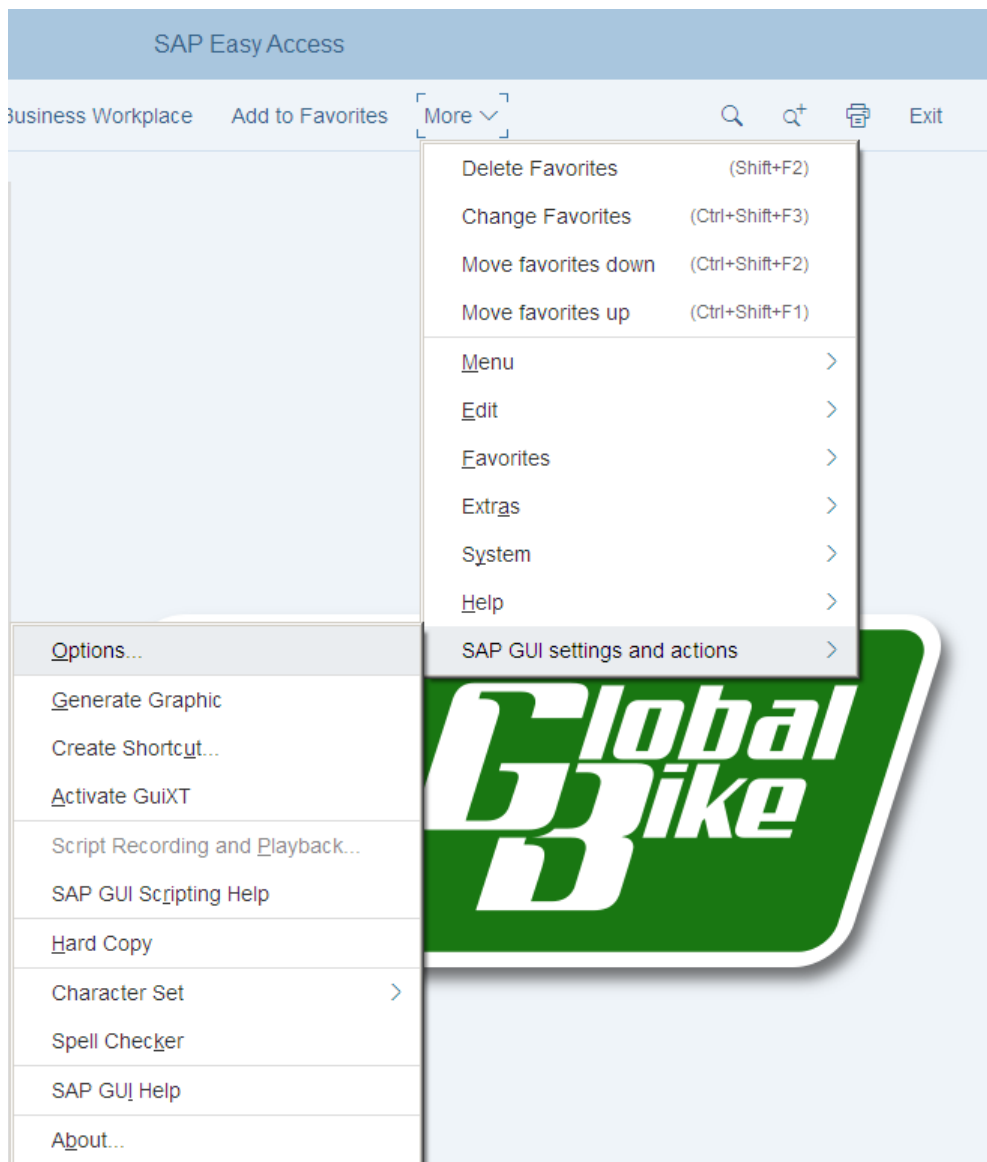

Step 3: Customize Local Layout

Task Use the menu to change user-specific settings.

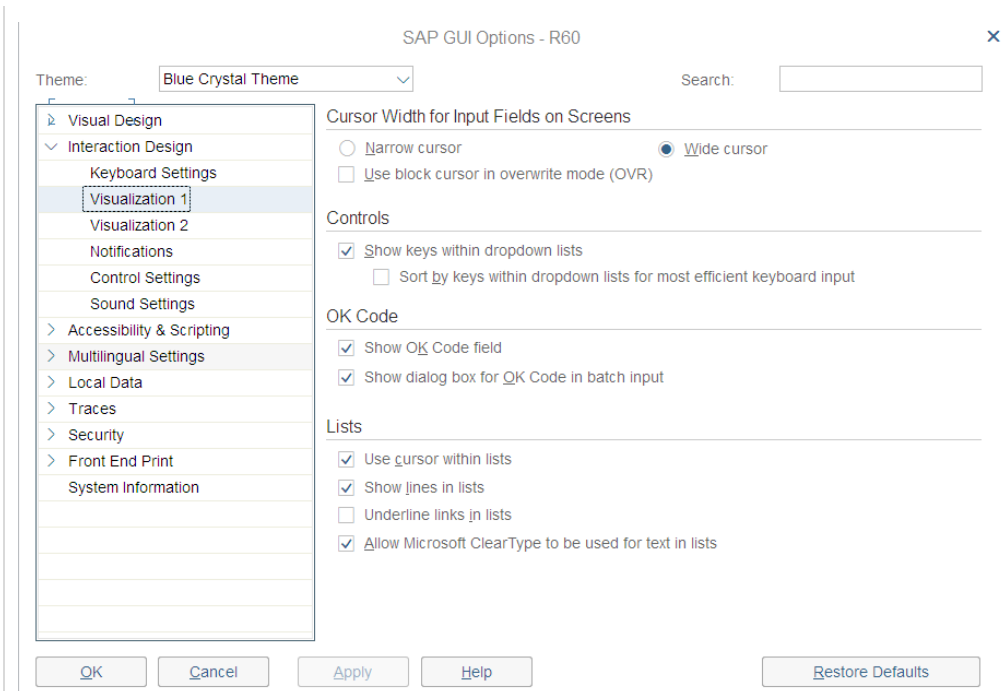

Time 10 Min.

Choose **More** ► **SAP GUI settings and actions** and select *Options*.

Local Layout

Within the new screen, expand Interaction Design and select Visualization 1. Activate the checkbox for *Show keys within dropdown lists*.

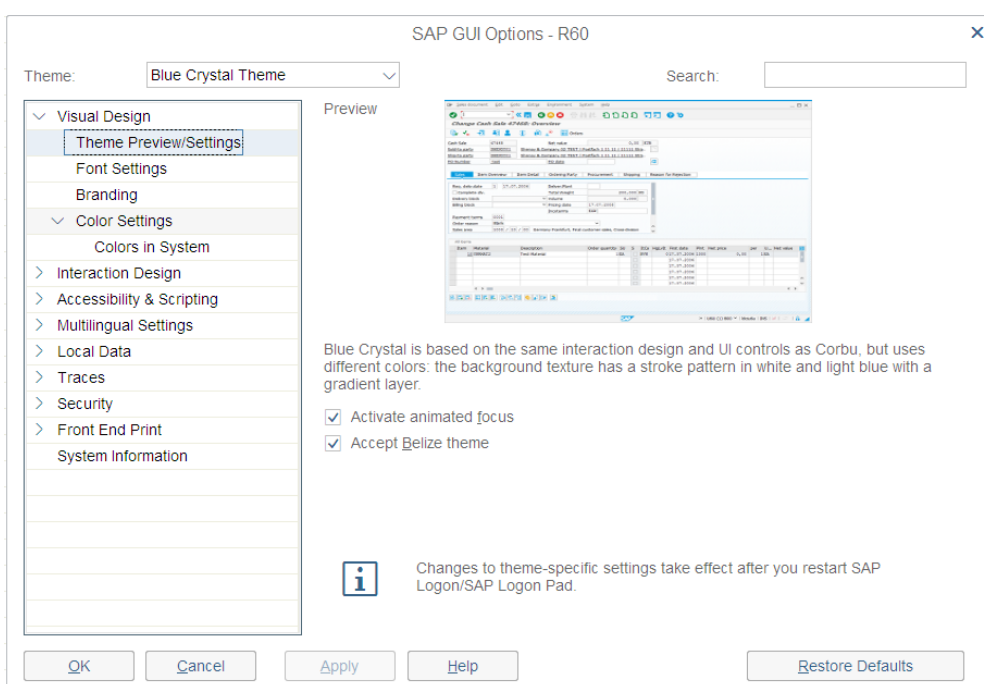

You can adjust warnings to not only show up within the status bar but within pop-ups as well. To do so, select the point Notifications and activate the respective checkboxes for showing success, warning and error messages in a dialog box.

Press Ok to save your changes.

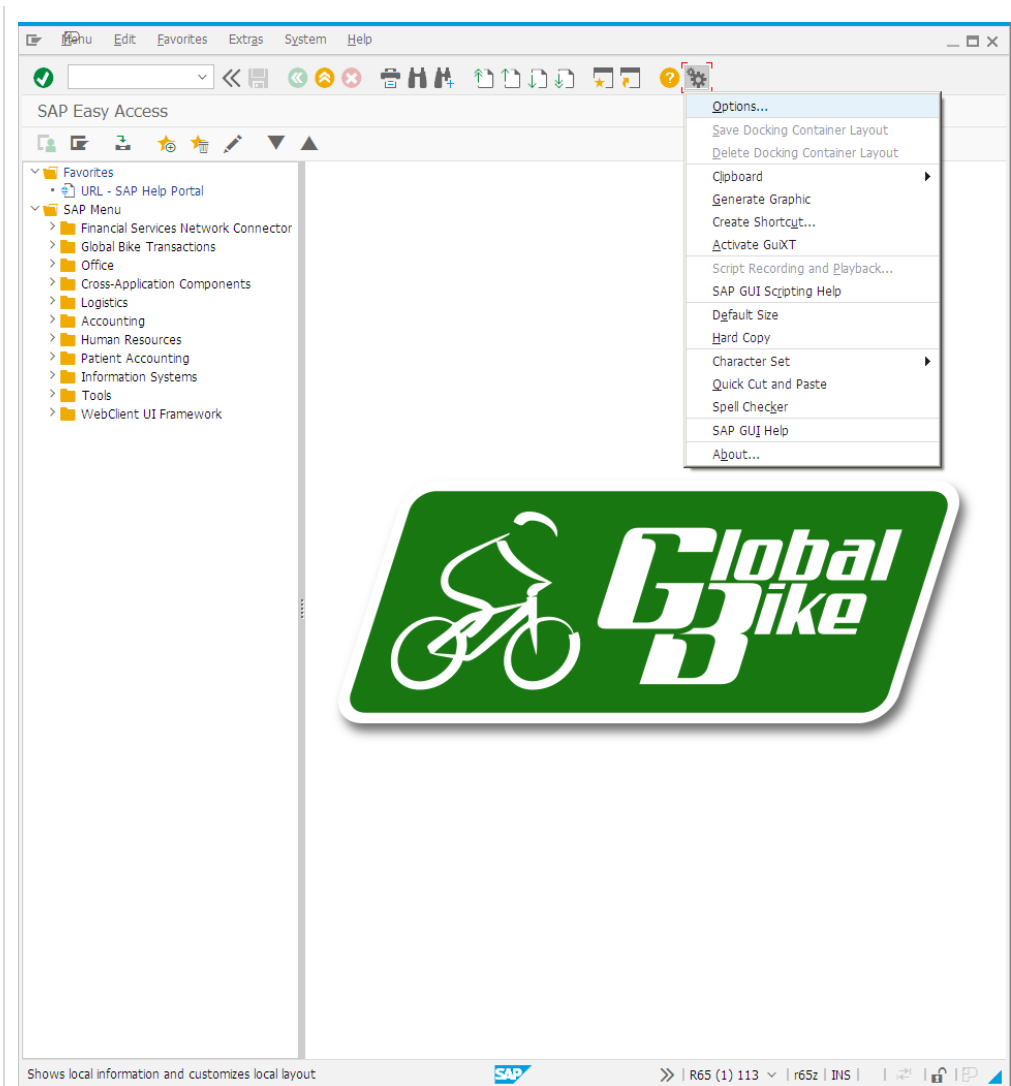

Now expand Visual Design and select Theme Preview/Settings.

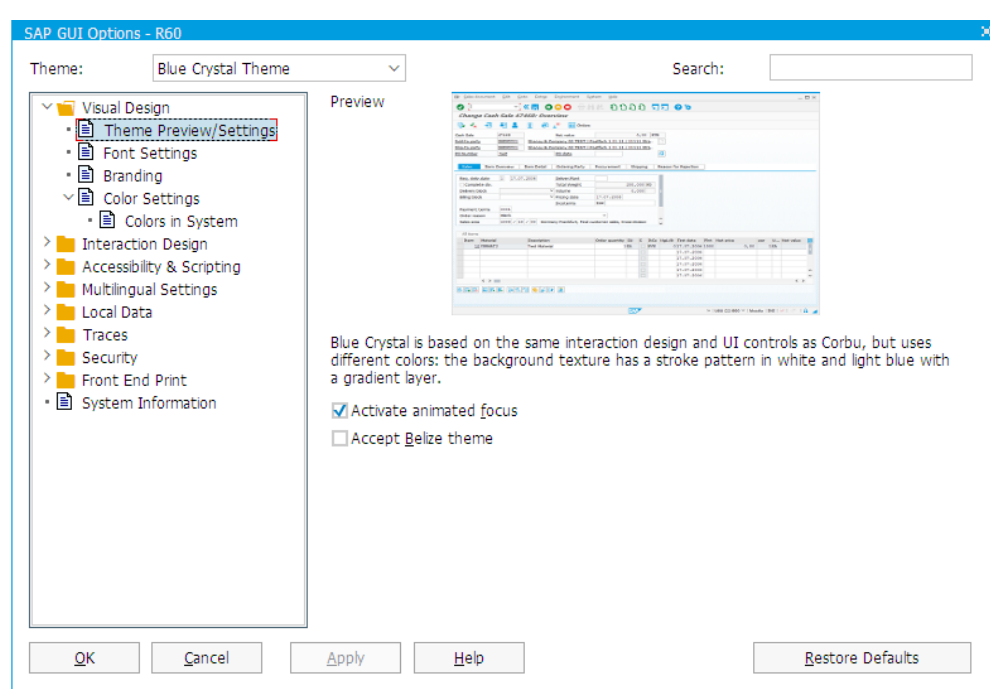

The SAP GUI recognizes whether SAP-Fiori is activated on your system. If so, the GUI automatically takes the SAP Fiori theme. The Belize Theme checkbox is automatically selected.

By deselecting the checkbox there is the possibility to return to the old design. After you deselect the checkbox, click  and then click . To activate the change, you must log on again. Click on  and confirm the warning with Yes.

Now log in again with your user and password. As you can see, the surface has changed.

Expand Visual Design and choose Theme Preview / Settings. Select the Accept Belize theme check box.

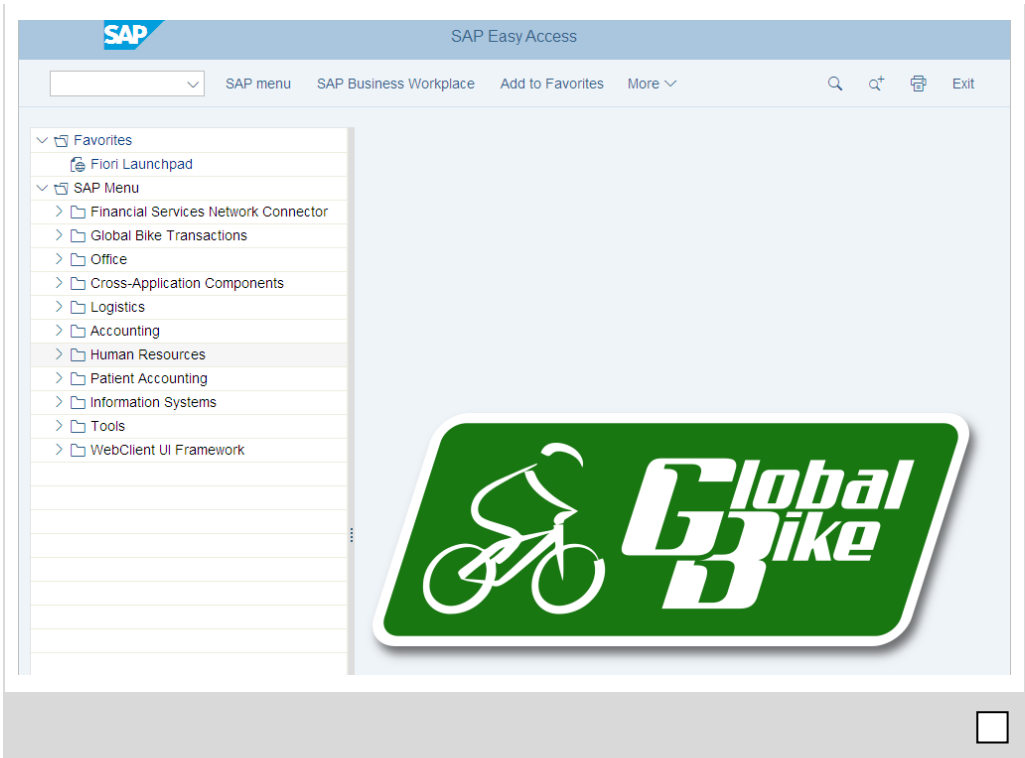

After that click  and then . To activate the change, you must re-log on again.

Choose  and confirm the pop-up with Yes.

Now log on again. The new interface is displayed.

Step 4: Favorites

Task Create personal favorites.

Time 10 Min.

Short Description Create your own favorites in SAP GUI and add objects to them.

If you frequently use a transaction, you can use drag&drop to add it to your favorites (or choose *Favorites* ► *Add*). You can then double-click it to run it without having to navigate through the SAP Easy Access menu. Furthermore, you can add folders, reports, files and web addresses as favorites.

Other objects

By clicking Favorites with the right mouse button, you can create your own hierarchical folder structure.

You can add any link to your favorites, to do so click Favorites with the secondary mouse button. Choose *Add other objects* then Web Address or File. In the dialog box, enter a name and the URL shown below. To confirm choose **Continue**.

Exercise 2

Create/Expand your own favorites menu.

2.1 Add the SAP Help Portal using the URL *help.sap.com*.

2.2 Add the following transaction as a favorite:

Logistics ► Sales and Distribution ► Sales ► Order ► Display

Step 5: Transaction Codes

Task Get familiar with SAP transaction codes

Time 10 Min.

Short description Learn how to effectively make use of SAP transaction codes and parameters.

There are several possibilities to call up transactions in the SAP system.

The quickest way to run a transaction in the SAP system is to enter the transaction code. Every transaction has a code, which generally has four characters.

SAP Easy Access Menu

By navigating through the SAP Easy Access Menu and using path structures you get to the transactions. Then double-click on the transaction to run it.

Transaction Code

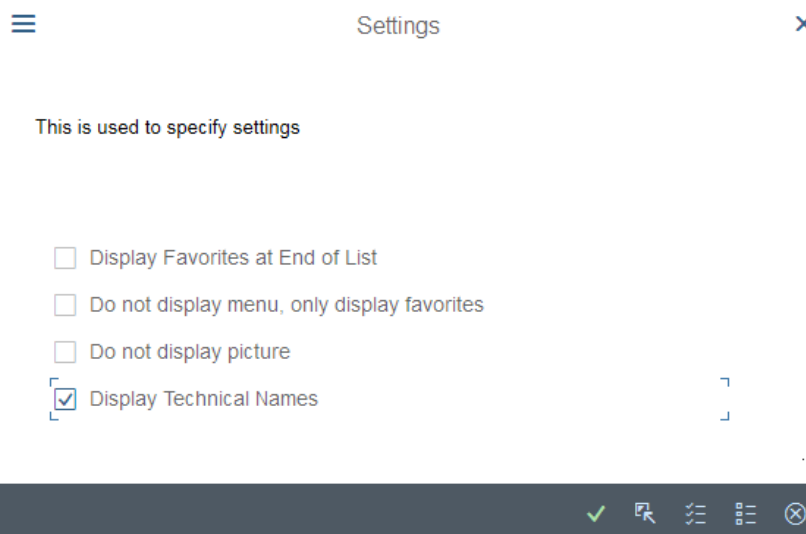

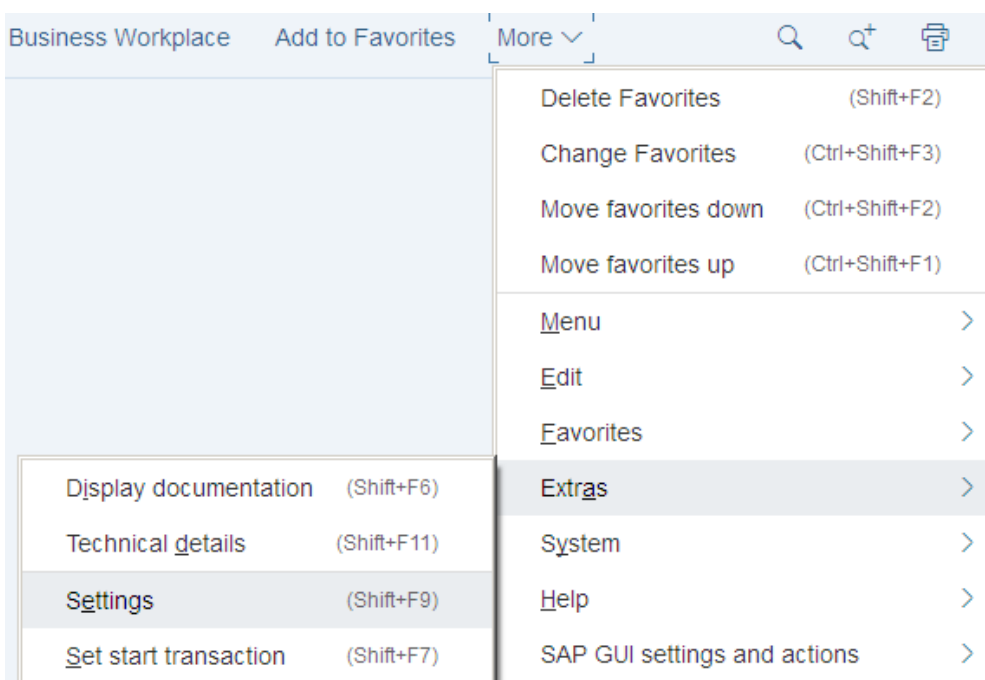

Every business transaction (not every screen) has a corresponding transaction code in SAP. To display transaction codes, choose **More ► Extras ► Settings** and select *Display technical names*.

Transaction Concept

Transaction Code

SAP Easy Access Menu

Transaction Code

Note: The command field in which transaction codes are entered can be found on the upper left.

You can use various control parameters to influence what happens to the session when you call a transaction.

/n Exits the current transaction

/n

/i Closes the current session

/i

/o List of all modes (with option to delete and create new)

It is also possible to use /o to open a transaction in a new mode. Assume that you are in the transaction Business Partner (BP) and want to open a new mode for the transaction Stock Overview (MMBE). To do this, enter the command field /oMMBE. After you have clicked Enter, a new mode opens with transaction MMBE.

There is the possibility to open several GUI windows in parallel. If you want to create a new GUI window, choose  and then **New GUI window**.

To close a window, select  in the upper right corner, press the Alt + F4 key combination or select  and Close.

Exercise 3

3.1 What is the business process performed using transaction code VA03?

_____.

3.2 What is the business process performed using the menu path:

Logistics ► Sales and Distribution ► Master Data ► Business Partner
► Customer ► Display ► Complete?

_____.

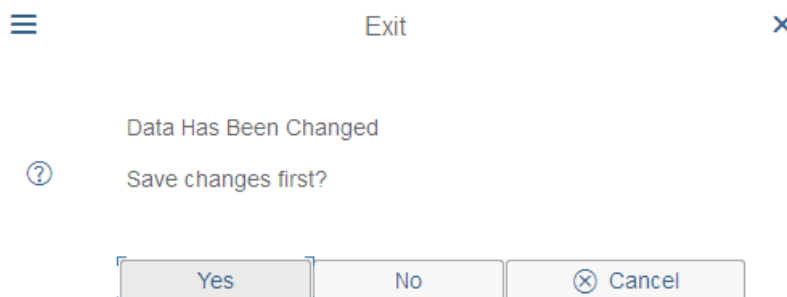

3.3 Which transactional processes are performed using the following transaction codes?

XK03: _____.

MM02: _____.

ME23N: _____.

When leaving a transaction with **Exit** you may be confronted with the displayed dialog box. Make sure that no unsaved data is visible in the current mode. Then select Yes.

User specific settings

Using the command field enter transaction SU3 and switch to the Defaults tab. In this tab, general settings like Logon Language, Decimal Notation and Date Format can be determined for your user.

Please choose **EN** (English) for *Logon Language*, **X 1,234,567.89** for Decimal Notation and **MM/DD/YYYY** as *Date Format*.

Logon Language:	<input type="text" value="EN"/>
Decimal Notation:	<input type="text" value="X 1,234,567.89"/>
* Date Format:	<input type="text" value="2 MM/DD/YYYY (Gregorian Date)"/>
* Time Format (12/24h):	<input type="text" value="1 12 Hour Format (Example: 12:05:10 PM)"/>

Save your entries using

Exercise 4 For the following exercise switch to transaction VA03, to do so leave the current transaction by using .

4.1 How many sessions can be open in the system in parallel? (**Tip** Click on the corresponding icon until the system does not create another session.)

_____.

Step 6: Help

Task Get familiar with SAP's help functions.

Time 10 Min.

Short Description Get familiar with help functions in SAP systems. Use the F1 and F4 help as well as the SAP Help Portal.

Several types of help are available in the SAP system. The most frequently used ones are the F1 and F4 keys.

F1 and F4 help

The screenshot illustrates the SAP Customer Display Initial Screen with two help windows open. The F1 help window, titled 'F1: Description of input fields', shows the 'Customer Account Number' field with a description: 'A unique key used to clearly identify the customer within the SAP system.' The F4 help window, titled 'F4: Value list', shows a table of customer accounts with columns for City, PostCode, Name 1, and Customer.

City	PostCode	City	Name 1	Customer
DE	04277	LEIPZIG	GRANITSESEL	18000
DE	10999	BERLIN	CAPITAL BIKES	16000
DE	17389	ANKLAM	OSTSEERAD	21000
DE	20249	HAMBURG	ALSTER CYCLING	14000
DE	22767	HAMBURG	RED LIGHT BIKES	23000
DE	30629	HANNOVER	CRUISER BIKES	17000
DE	39126	MAGDEBURG	VELODOM	24000
DE	44784	BOCHUM	FAHRPOTT	19000
DE	63263	NEU-ISENBURG	AIRSPORT BIKES	13000
DE	69120	HEIDELBERG	NECKARAD	20000
DE	70499	STUTTGART	RADLELAND	22000

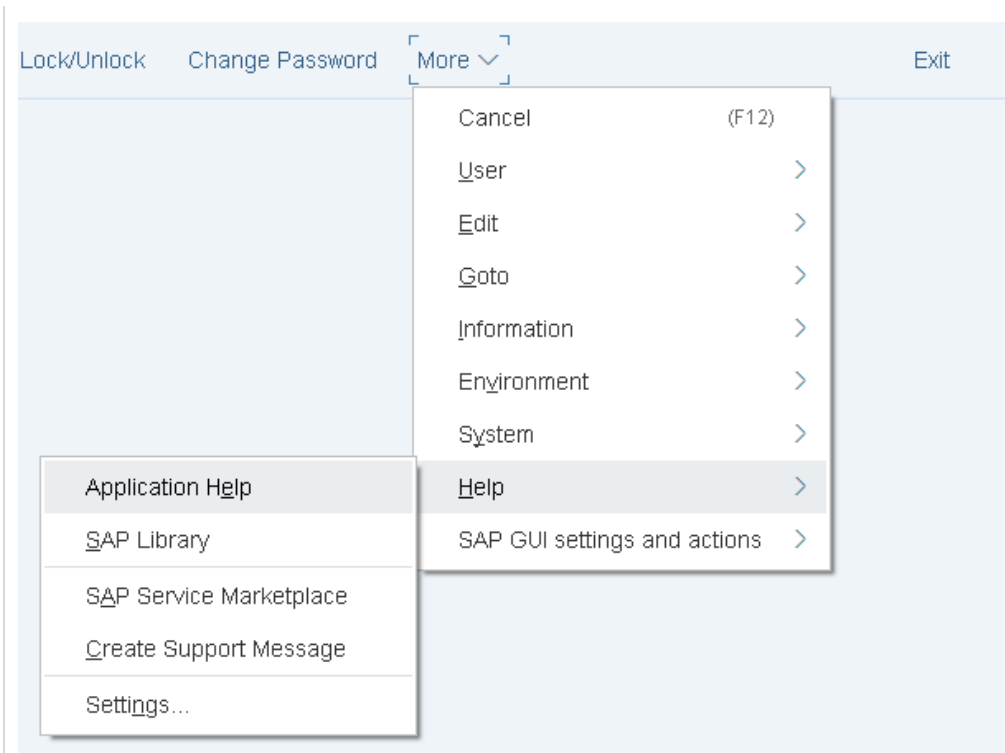

F1 provides you with explanations for fields, menus, functions, and messages. In the F1 help, you can choose  to get technical information.

F1

F4 gives you information and possible entries. You can also use the F4 help by choosing  directly to the right of a selected field.

F4

Further help can be found in the *help* menu. Choose *Application Help* or *SAP Library* to open the online SAP Library. You can also access it on the Internet at help.sap.com.

Exercise 5

5.1 Call up transaction **VA01** and select the field *Distribution Channel*.

Press the F1-button.

What is a distribution channel (in a few keywords)?

5.2 Close the window with definition of the Distribution Channel. Stay in transaction **VA01**. Click the field *Order Type* and press F4. What do the order types *SO* and *OR* stand for?

SO _____

OR _____

5.3 What is the difference between these two types of orders?

Step 7: Multiple Selection

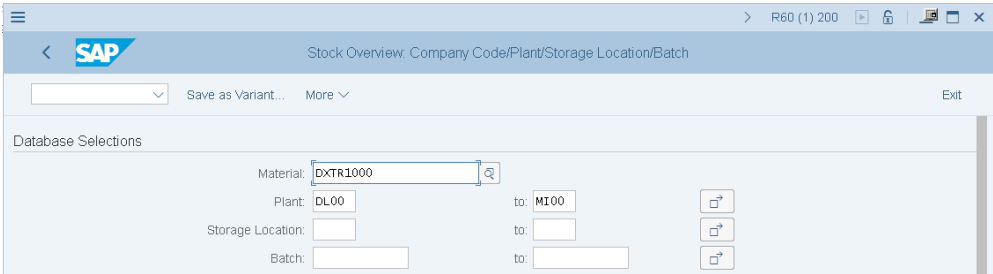

Task Understand and perform multiple selection.

Time 10 Min.

Short description Understand and perform multiple selection in SAP GUI and get to know useful hints about it.

Choose transaction **MMBE** to get to the Stock Overview Screen. Display the stock from the plants in Dallas and Miami.

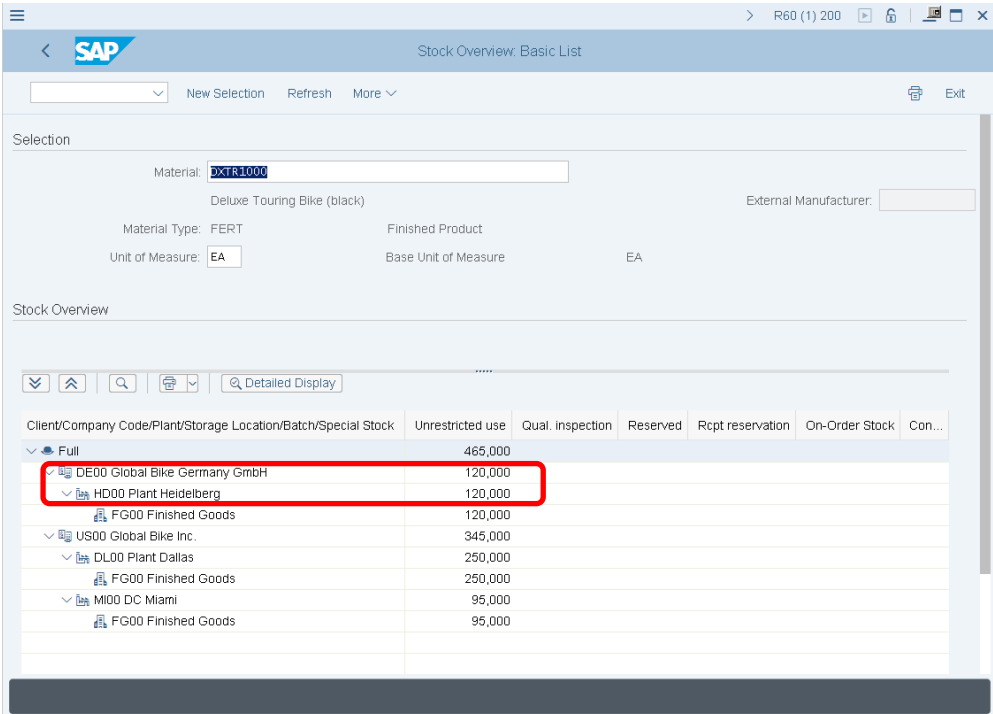

Please assure, that when you enter the two plants (**DL00** and **MI00**) in the overview as shown below, you will not get the correct result.

The screenshot shows the SAP Stock Overview selection screen. The 'Database Selections' section is visible, with the following fields:

- Material:
- Plant: to:
- Storage Location: to:
- Batch: to:

As you will see in the following screen, the plant in Heidelberg was chosen as well. This is due to the fact that the SAP system displays all plants which range alphabetically between DL00 and MI00.

The screenshot shows the SAP Stock Overview Basic List. The 'Selection' section displays the material details:

- Material:
- Deluxe Touring Bike (black)
- Material Type: FERT
- Unit of Measure: EA

The 'Stock Overview' section shows a table with the following data:

Client/Company Code/Plant/Storage Location/Batch/Special Stock	Unrestricted use	Qual. inspection	Reserved	Rcpt reservation	On-Order Stock	Con...
Full	465,000					
DE00 Global Bike Germany GmbH	120,000					
HD00 Plant Heidelberg	120,000					
FG00 Finished Goods	120,000					
US00 Global Bike Inc.	345,000					
DL00 Plant Dallas	250,000					
FG00 Finished Goods	250,000					
MI00 DC Miami	95,000					
FG00 Finished Goods	95,000					

Therefore click  to return to the last screen. Select the black Deluxe Touring Bike (DXTR1000) and click  afterwards.

Choose multiple selection . Then choose the plants you want to display and press *Enter* or .

Plant (1) 5 Entries found

Restrictions

	PInt	Search Term 2	Search Term 1	Postl Code	City	Name 2	Name
<input checked="" type="checkbox"/>	DL00		00	75039	Dallas	Plant Dallas	Global Bike Inc.
<input type="checkbox"/>	HD00		00	69118	Heidelberg	Plant Heidelberg	Global Bike Germany GmbH
<input type="checkbox"/>	HH00		00	20457	Hamburg	DC Hamburg	Global Bike Germany GmbH
<input checked="" type="checkbox"/>	MI00		00	33126	Miami	DC Miami	Global Bike Inc.
<input type="checkbox"/>	SD00		00	94105	San Diego	DC San Diego	Global Bike Inc.

Afterwards select *Execute*  and again .

Selection

Material: 

Deluxe Touring Bike (black)

Material Type: FERT Finished Product

Unit of Measure: Base Unit of Measure

Stock Overview

Client/Company Code/Plant/Storage Location/Batch/Special Stock	Unrestricted use	Qual. inspectio
Full	345,000	
US00 Global Bike Inc.	345,000	
DL00 Plant Dallas	250,000	
FG00 Finished Goods	250,000	
MI00 DC Miami	95,000	
FG00 Finished Goods	95,000	

Step 8: Working at Global Bike Group

Task Display Global Bike information in SAP GUI.

Time 15 Min.

Short Description Navigate through the SAP system to display the most important information of your enterprise in Global Bike.

Exercise 6

6.1 How many black Deluxe Touring Bikes do you have in stock?

(**Tip** Therefore use transaction **MMBE**.)

6.2 Which customers can be identified in Global Bike?

Follow the menu path: **Logistics ▶ Sales and Distribution ▶ Master Data ▶ Business Partner ▶ Customer ▶ Display ▶ Complete**

(**Hint** Click on the field *Customer* and press F4. Then enter your *Company Code* (DE00).)

6.3 What is a debtor?

Step 9: Logging Off

Task Log off the system.

Time 5 Min.

Short Description Log off the SAP system.

Choose **Exit** to end the current session. The confirmation prompt shown on the right informs you that unsaved data will be lost. Once you are certain that you have saved all entries, you can confirm the prompt by choosing *Yes*.

Log Off
